

June 22, 2021

To Whom It May Concern,

This letter is providing notification of certification extension of the ISO 14001:2015 certification for the location(s) referenced below.

Per ANAB Heads Up 448 (2020/02/28)

If a recertification audit or other recertification requirements cannot be completed prior to the expiration of an ANAB-accredited certification only because of reasons directly related to the coronavirus outbreak, ANAB is allowing CBs to extend the certification up to six months from when the certification expires.

- a. If the CB is unable to gain confidence in the system for which the extension would be granted, the CB must follow its own process, including suspension if appropriate.
- b. When the CB successfully completes the recertification activity, the expiration of the renewed certification should be based on the original recertification cycle. This means not providing the organization an additional six months of certification. When the organization is recertified, it will not be for three years from the recertification decision, but three years from the previous expiration date.

Currently certificate EN17460 expired on June 17, 2021. An audit has been planned beyond that date for October 25, 2021. Upon successful completion of that audit, the certificate will be updated and maintain the three year validity from the previous expiration date.

Location(s): (includes buildings contained on certificate EN17460)

Flextronics International USA Inc.

847 Gibraltar Drive

Building 5

Milpitas CA 95035

Please use this letter to answer any questions concerning the status of their certification. If you have any questions or need further assistance feel free to call me at 817-602-8450.

Sincerely,

A handwritten signature in blue ink that reads 'Jerry L. Wilson'.
